

High performance. Delivered.

Wall Street Journal: Kids are the Technology Experts

Video Transcript

Wall Street Journal survey defines digital experts as...

...youth ages 14-15.

How many digital devices do you have?

I have 2 phones

3 laptops

3 tvs

3 iPads

A computer and 2 Laptops

A ps2, a ps3, a ps4

3 tvs, wait 4 TVs I think

What social media sites are you active on?...

...how long each day?

I 'm on Twitter. I compose tweets so people know what your doing.

I send photos to my friends

I use Snapchat

Instagram

I like Pinterest where you can post things on different boards. Like what you like, food that you want.

Probably like about an hour

6 hours on YouTube

I'd say like 2 hours.

Probably about a half hour

Don't judge, probably 5 hours.

In the future what are some of the things you would like to see created by technology?

Flying cars

Yes

I wish I could teleport. Ohhh.

I want a machine I can feed my homework into and it comes out done. Done. Done. Yes.

You know back to the future? A hovercraft.

It's called 7D my life. You become the player

How do you think technology can enhance the shopping experience in the future?

A closet that has like the entire shopping experience in it. And like a computer on the side and you can just swipe.

You can just take it out of the computer and try it on. See if you like it. But if you don't like it, you just put it back and pick out another thing.

Drone delivery that can deliver stuff in like 30 minutes or something.

So they should scan my foot for the perfect fit. And just give me the shoe. And be like here's your shoe. And I don't have to try anything on.

What if stores didn't exist in the future?

No no no no. I'd still want stores.

I still like the experience of going to the mall.

You can go grab a bite to eat with your friends. And then you can go shopping. I think it's fun.
