

High performance. Delivered.

# Star: Transportation Management

## Video Transcript

100% web based

Increased efficiency

Reduced costs

Designed for the oil & gas industry

For the planning and coordination of air transport operations, vessels and transportation of people and materials, Star is a solution by Gapso, which was recently acquired by Accenture

Operations fully managed over the web

Access controls defined by each user's profile.

Several factors influence the logistics of Oil & Gas companies and contribute to its complexity:

Variable position of platforms

Weather conditions  
Capacities of helicopters and ships

Weight of employees transported

Transport cost

Total efficiency in the logistic process

Highest transparency for the operation

Best practices and procedures

Determination of actual demand

Cost reduction

Get to know the best logistics solution for the Oil & Gas sector, with the ideal customization for your company, and the industry knowledge that only Accenture has.
