**Pepper the Robot Presents**  
**Accenture Health**

## **Accenture 2017**

### **Pepper the Robot Presents Accenture Health**

**Host:** Welcome to the Accenture stand...I'd like to introduce you to someone special. This is Pepper, who is showing our clients the potential for improving healthcare using robots.

**Pepper:** Hello, it's a pleasure to meet you.

Accenture Health is all about Insight Driven Health, which is the foundation of more effective, efficient and affordable healthcare.

We help the world's leading healthcare organisations use knowledge in new ways so that patients receive high quality care.

We combine experience, business and clinical insights and innovative technologies to deliver the power of insight driven health.

For example, robots, artificial intelligence and automation are going to play a big role in the future of healthcare and we are guiding our clients how to apply these technologies.

So I thought I'd join the team here at WoHIT to help demonstrate this fact. I hope you enjoy the time!
