DIGITAL POLICING SUMMIT 2017 LONDON, FEB 2017

48 HOURS VIDEO TRANSCRIPT

Stephen Kavanagh, Chief Constable, Essex Police

What are the skills that policing needs for the future?

Tim Godwin, Managing Director, Public Safety, Accenture

It's about transforming the core, identifying the new, scaling the new

Stephen Kavanagh

We've heard that there are opportunities out there using technology right

Tim Godwin

Pivoting to a new way of operating

Stephen Kavanagh

How do we stop investing in what was our core business

Getting those cost reductions into policing

Stephen Rees, Deputy Assistant Director (Intelligence), Federal Bureau of Investigations

Today the speed of technology is so rapid

James Slessor, Managing Director, Global Public Safety, Accenture

Police forces are stepping up to the opportunities that digital opens up

Stephen Rees

Going back to your office, typing it up, waiting for someone else to enrich it is just not fast enough

Allan Fairley, Managing Director, UK Police & Public Safety, Accenture

It's allowing police officers to have access to the information that they need which in some cases is already there.

Dave Hudson, Deputy Commissioner, New South Wales Police Force

As criminals look to take opportunities from vulnerabilities in the system and I think that's the scary part for police.

Agata Cooper, Senior Manager Digital Strategy Public Safety, Accenture

Starting to be prepared for the 2.0, for the hyper-connected world is actually something we should be looking at.

Steve Wilson, Head of Cybercrime, Europol

This is something now that's got the capacity not just to knock over companies but actually nation states.

Tim Godwin

So, it'll actually be about disrupting, digital disruption.

Dave Hudson

We have to be more preventative in this approach

Tim Godwin

It will be about interdicting on the internet to prevent harm rather than actually trying to catch offenders

Dave Hudson

Because arresting your way out of it is not the solution.

Ger Daly, Senior Managing Director, Defence and Public Safety, Accenture

So more flexible, more agility, more geared towards young people and the digital talent that they have

Agata Cooper

I think the most tricky thing to balance is your digital natives that are joining your organisation now

Giles York, Chief Constable, Sussex Police

There's a hell of a lot more skillsets we already have in the workforce that we have to be able to hold onto.

Hacer Evans, Director, Digital Policing Portfolio

Criminality has moved into a different space, into the digital space and also the cyberspace.

Ger Daly

And so the key message seems to be that the technology is there, it works, it's ready.

Stephen Kavanagh

Let's have these pilots, let's test them quickly but when they work, let's roll them out nationally.

Alan Fairley

It's about creating an organisation that can be nimble

Hacer Evans

The ability to actually devolve responsibility that actually is inextricably linked to innovation

James Slessor

Being prepared to embrace new technologies
Being able to challenge traditional models and try and adopt new models

Ger Daly

I think we're going to see the public sector working with the private sector to make these changes happen

Dave Hudson

As a world policing organisation we need to learn off each other and I think that's the secret.
