

Digital Health Tech Vision 2017 Overview-- video

AI is the new UI

It means that the way you interact with technology is smart and adaptive and meets you on your own terms.

Ecosystem Power Plays

It's not just a technology; it's the businesses around the technology working together, taking advantage of the technology to get the real social benefit.

Workforce Market Place

The people we need to do the work are everywhere in the world and we now have the ability to reach them and find them and get the best out of them.

Design for Humans

Technology is something that works for people on their own terms as opposed to people having to work for technology.

The Uncharted

The technologies that we've been talking about are going to create problems we don't understand and we don't have answers to now. We will, and we will figure them out. But we have to be prepared to develop the businesses while recognizing that the problems that they raise are novel to our society and figure out how to solve them at the same time.
