

# THE DIGITAL WORKER

Accenture is driving an exciting agenda to make it one of the largest and most modern digital organizations in the world.

Accenture has driven a bold and exciting agenda to make it as one of the largest and most modern digital organizations in the world. Over 400,000 digital workers in 200 cities across more than 50 countries. Accenture truly is the height of skilled workforce leaving in the new and transforming itself with digital technologies in sales, in HR, in finance, in the way we communicate and collaborate. We've stayed ahead of the digital curve by constantly innovating and exploring new services for our clients and our employees. We've created a new level of experience across our company. An environment to encourage innovation, collaboration, creativity, and productivity. And all of this in today's mobile connected world.

Every digital worker has specific needs and requirements which we strive to meet. Choice is good. Flexibility is good. We focused on what our employees told us they need, the experiences they desire, and how they want to engage. This allows employees to do their best work wherever they are and whatever device they may be using.

We want to provide even more agile ways of working using mobile apps, cloud based capabilities, and rolling out the latest technologies, like Windows 10 and Office 365, with the fastest deployment of Windows 10 in the world and we continue to launch new services at heightened scale. Services like Skype for Business, our suite of mobile enterprise apps, and our global network of broadcast studios and innovation hubs. These give our people multiple ways to work that nurture creativity and high performance.

A digital enterprise has many layers, some yet to be fully explored. At Accenture, we continue to dig deeper and leave no stone unturned to ensure we tap into all the value that digital technologies have to offer.

Thank you. We look forward to continuing the dialog.
