

# ACCENTURE DIGITAL HUB SINGAPORE

**Digital Hub** is an open workspace area, that makes it easier for us to collaborate with you as we work together to harness the latest technologies, creating innovative prototypes and business use cases.

## 1. MAKER STUDIO

The Maker studio provides a space to quickly turn concepts into prototypes through rapid software application development. It is where we create and explore a wide range of prototypes, from hardware to 3D modelling.

## 2. RUMBLE ROOM

Our Rumble Room comes equipped with a 12-foot interactive touch-screen monitor, enabling videoconferencing with other Accenture innovation centres around the world. It is yet another space where you can co-create with us, testing and experimenting to make ideas come to life.

## 3. ACCENTURE APPLIED INTELLIGENCE INNOVATION CENTRE

Our Accenture Applied Intelligence Innovation Centre uses advanced analytics, artificial intelligence and machine learning to solve business problems. This is where we uncover actionable insights that can help you improve your service delivery capabilities, quickly scale solutions

## 4. INTERACTIVE/ FJORD STUDIO

You're welcome to work alongside Fjord's teams in our studio. Co-creating with our experts can help to build your teams' capabilities. It can also boost your organisation's culture of collaboration and innovation.

## 5. CONTENT AND USABILITY TESTING STUDIOS

Our Usability Testing Room, Recording Studio and Post-Production Room for video production are cutting-edge creative workspaces. They help our expert teams cultivate creativity and innovation across every phase of your projects.

## 6. ACCENTURE COLLABORATION CORNER

Our open workspace areas make it easy for us to collaborate with you as we work together to harness the latest technologies, creating innovative prototypes and business use cases.
