

# SAP LEONARDO LIVE

## VIDEO TRANSCRIPT

**Aidan Quilligan**  
**Managing Director, Accenture Director**  
**Global Industry X.O Lead**

Accenture has been working with SAP for some time now to combine the best of our assets and expertise with the Leonardo platform.

Already, there are many apps available.

To develop this situation further, we are focused on five things.

Firstly, we're working with SAP to co-develop the predictive analytics integrator as part of the Leonardo core.

And we're also porting dozens more Accenture Analytics apps over onto the platform.

Then, looking forward, we are using our Liquid Studios and our Innovation network to create many more apps.

We're also building a suite of industry vertical solutions in IIOT.

Finally, we're throwing open the doors of our Garching Industrial IoT Innovation Center so that clients, customers of SAP, can come and experience and trial out what it really means when everything is smart, connected, living and learning.
