

Changing the Future of Pharma Together

What's the next big thing for Life Sciences?
Big Thing. Many Things.

Accenture Life Sciences Cloud for R&D
ALSC Built for the industry with the industry.

Jonathan Bur

Managing Director - Accenture Life Sciences Cloud for R&D

We've been doing this for five years now and it's just really exciting to see the collaboration with clients to get everyone together and really advance the roadmap for the Accenture Life Sciences Cloud.

Chandi Kodthiwada

Product Leader - Accenture Life Sciences Cloud for R&D

This is our favorite time of the year, we get to spend an entire day with our coalition members, present our big ideas, share our strategy and figure out what the next big thing is to solve. Today was all about AI and machine learning.

Reetika Fleming

Research Director, Insurance & Analytics - Hfs Research

My presentation today was about the three change agents that we see as enterprises start their journey into the digital age. So, there are smart analytics, automation and AI or as we like to call them at Hfs the triple-eight trifecta. We believe that data and data curation is really at the foundation of these technologies and it is at the intersection of them that value lies.

Jonathan Palmer

Senior Director Product Strategy, Digital Trials - Oracle

The whole point of the coalition was to work within this pre-competitive space. We're really about competing at the molecule level and not at the technology or process level. This is a great opportunity for all of us to work together.

Shelley Padgett

Sr. Director of IT Medicines Development - Eli Lilly and Company

We're going after sustainability, so you know this is the core of our business and this is where all of our patient data is. For us it's critical and so to have sustainability in our systems as we move forward is important. So, the initial part for us is, let's get into the core part of the house and let's get that in a sustainable fashion.

Adrian Cottrell

Vice President of Clinical, Medical & Regulatory IT - GSK

I think what you see each time it gets bigger and it's growing there's different attendees on there a good thing too is that we realize as the consortium grows we have to kind of almost keep reinventing ourselves at a couple of years because to really get bigger you have to shed your skin and then become something else.

Stay tuned for more groundbreaking innovation and news on the Accenture Life Sciences Cloud for R&D.

Next coalition summit in Berlin, Spring 2018.
