

WHAT'S NEXT FOR ACCENTURE LOGISTICS PLATFORM?

VIDEO TRANSCRIPT

Accenture believes that the time and technology is ripe for a new last-mile delivery model.

Evolved consumer expectations, retail supply chain investments and a fundamental step change in computational power allow for new opportunities for last mile optimization, aggregation, and differentiation.

Accenture is making a significant investment in a continuous delivery solution that will enable our clients to lead in the new delivery reality by better utilizing machine learning and artificial intelligence to improve consumer delivery experiences while reducing overall delivery costs.
