

ACCENTURE RUNS ON MICROSOFT

VIDEO TRANSCRIPT

Hello, my name is Tony Leraris, and I'm responsible for Accenture's enduser Technology infrastructure capabilities.

Here at Accenture, living and working in the New is what we do.

And we are happy to be the first ones to try new capabilities from our Microsoft friends in Redmond.

Technologies like Skype for Business, OneDrive and Intune are phenomenal in supporting Accenture's mobile workforce.

Being on the leading edge is important for us because our clients expect it.

Microsoft tools enable Accenture people to deliver value to their clients, and collaborate with them in the most productive way possible.

Our extensive global footprint is evidence that Accenture runs on Microsoft. Monthly Skype usage has reached 350 million audio minutes and 30 million video minutes.

We have 400 thousand units running Windows 10.

Close to 500 thousand Accenture mailboxes are running in Office 365.

E-mail isn't the only thing in the cloud.

Microsoft's OneDrive has revolutionized secure real-time collaboration and file storage in the workplace.

With 1.2 billion files and 3.3 petabytes of data in OneDrive, our journey is well on its way, but we haven't crossed the finish line yet. We continue to focus on driving OneDrive adoption and usage.

Our migration of SAP business warehouse in SAP HANA to the Azure cloud was a major undertaking which has delivered the scale, agility and performance we expected, and positions Accenture for future growth.

Our Azure footprint will continue to increase, and the plan is to shift many other business-critical applications to Azure.

Focusing again on Accenture's mobile digital workforce, we are pleased to be an early adopter of Intune, which offers an integrated, simplified mobile device management experience that our people love, with the security we demand.

Two newer capabilities we're really excited about are Microsoft Teams and Surface Hubs.

Surface Hubs connect people from different offices, and the whiteboarding capabilities allow people to work very productively without spending hours or dollars traveling.

Teams will become a destination where everyone spends their time – a conversation platform bringing Accenture people, clients and partners together to connect, collaborate and get things done.

We believe that Teams hold the potential to greatly transform the way we communicate.

As we continue our journey to enhance the digital experience for our people, deliver work to our clients, and lead in the New – it is clear that Microsoft tools are critical to our vision.

We are excited about a promising digital future – one where Microsoft capabilities underpin an unparalleled Accenture experience.
