Your business faces a host of challenges. Increasingly complex processes, the changing demands of the digital consumer, and the ever-present pressure to improve business performance and drive revenue growth. New Technologies are accelerating the pace of business while also being disruptive and moving at high-velocity.

The Accenture Center for IBM Technologies (ACIT) Cloud Studio is uniquely positioned help you succeed in this New IT world.

Combining our strong industry knowledge, Design Thinking and User-Centered design with our deep experience with IBM’s Cloud Technology we convert your business vision into working, integrated minimum viable products in a matter of weeks.

We can help you:

- Boost speed with liquid software: Liquid applications are assembled leveraging modular architectures, next-generation integration techniques and a cloud-first, mobile-first mindset. IBM’s Mobile First Platform on the cloud allows us to build mobile applications at high-velocity.

- Build intelligent apps: automating the application lifecycle, harnessing a portfolio of big data, analytics and cognitive services, ensures faster speed to value and enables you to manage growing volume, velocity and complexity. With auto scaling, DevOps and Watson services all easily accessible on IBM’s Cloud,
we can build Intelligent Applications at high-velocity.

Extend your company’s boundaries: Connected applications provide the technical means to integrate your legacy systems like Mainframe and AS400 applications with business partners and customer ecosystems.

Our dedicated team at the ACIT Cloud Studio combines expertise across IBM’s portfolio of cloud-based solutions with Accenture’s deep industry knowledge in consumer goods, retail, life science, automotive, industrial and travel.

The ACIT Cloud Studio’s capabilities have been proven in a variety of projects. For Citibank, we developed the award-winning mobile app, Family Wallet, in less than four weeks, enabling Citi Gold customers to manage their family’s spending in real-time.

On another project, the ACIT Cloud Studio developed a minimum viable product for a retailer in just a few weeks. This project showcased an accelerated modernization strategy using existing AS400 legacy systems. With this approach companies can dramatically increase usability and productivity with a responsive web application that quickly responds to changes and is far easier to maintain.

Either from our incubators in vibrant startup-environments in Chicago, Bangalore, Oslo and Malaga or on-site at your location, the ACIT Cloud Studio is your stepping stone to reach the next level of success and become the leader in your industry.
