

PROGRAMA START ACCENTURE

TRANSCRIPT

Sara:
Who am I?
From the beginning...
I am Sara, I was raised in a Christian home

Salome:
I am Salome Rojas Rodríguez
I am 21, I was raised with my dad, my uncles
and my grandmother

Sara:
When I was little I said that, when I grew up, I
was going to have a lot of money and that I was
not going to get married
And I think that I am going well on that path

Salome:
When I was little I wanted to be a lot of things, I
wanted to be a doctor, veterinary, police,
psychologist

Sara:
I am really detached
From everyone, from everything
Nevertheless, one of the things I value the most
or if I start thinking of the most beautiful
moments I've ever lived, they have always been
family moments.

Salome:
And I also lost my mom when I was 9 years old

Then I lost my grand ma; the one who raised
me, and I said:

"Well, life is showing me something... it takes
away my mom when I was 9 but that is ok
because I have my grandma"

and then, when I am 13 I said:

"Life has taken someone again! So, defend
yourself as you can"

Sara:
I am not of having boyfriends

But I had a relationship and we were going to
get married when we reached the legal age

We went through an abortion

That's like one of the most difficult things I have
come through in my life...

The abortion

Salome:
When you don't have a relationship with your
mom

And you say "Well, I arrive home and I had a
problem and I tell my mom"

You become stronger and you say:

"I have to solve as I want"

Blows that you receive, and you say:

"React and solve, react and solve..."

Sara:
At my home, resources where not enough for
my mom and dad to say:

"We are going to give you a university"

They, off course they would like, but they still don't have the way of doing it

So, I had to work in order to study.

But once you start working and receiving money and dealing with it,

Your study stops being a priority

Until I was determined enough to say:

"No, I will quit my job and until I am not studying I will not get back to work"

And that is why I am here today...

Salome:
Everything that comes to your life, contributes.

And I feel that this program or this new opportunity will contribute a lot to my life

Even more if I was the one who asked for it

Sara:
I signed up with many expectations

I said: "This would be the best"

And they called me after some days...

That was the best! I was with my mom and dad at the moment

And they realize immediately how important that was for me

It was really exciting

Sara's dream today?

My dream has always been helping others, being able to live to help others.

If I form myself in a career and I do what I do

I will always want that, in some way, that may contribute to other people's life.

Salome:
That I create my own company, and someone tells me:

"Hey, I have grown up, I have everything I own, I am what I am because you gave me the opportunity one day"

That fills me up with... "Wow, amazing, It was because of me!"

I also love that about helping others and stuff

Sara:
Why do I love so much to help?

I feel that is why we were born for

That same joy, that satisfaction cannot be given by anything else

My goal or the thing I am aiming to is to work and with what I am working on, now that I am developing it

Being able to pay my studies

Because I am studying a technical career, but the idea is to get to engineering

So, sincerely, I see myself as one of the best ones in the area

Salome:
I always compare myself to the one I was yesterday, and I think:

"I have to be better than this person", so It would be like that.

And also, that someone looks at me and says

“I also want that, I mean, If she could I can also do it”

So, I would love becoming a role model

Sara:

I am aware that everything has its process, but this is the beginning.

For me this is an opportunity for reaching many goals,

Because goals at any moment will become the fulfillment of the dreams.
