

SAP LIQUID STUDIO FOR LEONARDO APPLICATION: CORPORATE NAVIGATOR

Details on your corporation on demand

Function: Reporting | Process: Finance | Industry: Cross-Industry

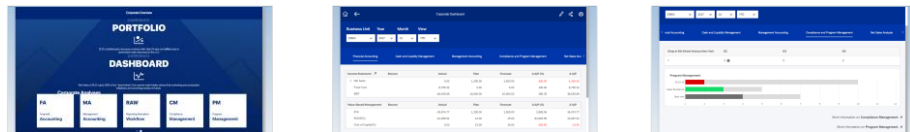

Application Overview

Executives constantly need pertinent and accurate information to support the decisions they make to run an effective business. With the growing importance of mobility in most of business, executives expect this information to be comprehensive, real time and accessible from everywhere.

Corporate Navigator is an application designed for executives and top management. It provides a clear dashboard to access the main financial key performance indicators (KPIs) of an organization on the fly.

Solution

The Corporate Navigator is a solution that enables the design and implementation of top management reporting. It combines several tools such as portfolio technique, one-page reporting, value driver trees, and risk management.

Business Value

- Better visibility on the financial state of business units
- Improved decision making.
- More efficient management and better responsiveness to issues.

Technologies in Use

- SAP Cloud Platform
- SAP S/4HANA

Features

- Platform independent—tablet, smartphones and desktop PC are supported.
- Screens and annotations can be easily shared by e-mail.
- Toolbar enables quick and easy annotation.
- Provides three levels of reporting:
 - Corporate portfolio: First level of reporting with a summarized graphical view about most important financials
 - Corporate dashboard (20 KPIs summarized in one page)
 - Corporate analyses: Detailed reports for more detailed analysis
