

# SAP LIQUID STUDIO FOR LEONARDO APPLICATION: SHIFT PLANNER

Simple and friendly team management

Function: Scheduling | Process: Human Resources | Industry: Cross-Industry

## Application Overview

Work scheduling and planning are key elements of team management. Managers must consider various parameters such as vacations, working hours, teammate availability to ensure an optimal usage of the workforce.

The Shift Planner application is a user-friendly SAP Cloud Platform-based tool that helps a shift planner to perform scheduling faster and more efficiently.

## Business Value

- Extends the SuccessFactors time solution with additional functionality to plan shifts and tasks.
- Provides an easy-to-use and integrated solution for team planning.
- Helps to optimize workforce usage.

## Technologies in Use

- SAP Cloud Platform
- SAP SuccessFactors

## Solution

Shift Planner is as an extension of SAP SuccessFactors to support work schedules and the task assignment process.

## Features

- Intuitive user interface for task creation.
- Enables users to assign standard and custom work schedules to team members with update back in SAP SuccessFactors.
- Allows assignment of daily tasks to employees considering their standard working hours and vacation information.
- Proposes automatic tasks and work schedule assignment based on historical values.
