# **ONLINE PLANNER**

As a project manager, being on site and keeping track with project planning can be quite a challenge. Wouldn't it be great to have an easy-to-use mobile application to interact with your existing project planning? What if it was possible to immediately update a project while you were out and about?

At Accenture Liquid Studio for SAP Leonardo, we tailored a solution to your needs Online Planner. Online Planner helps on-site users to maintain an updated version of the project's planning related to tasks, status and recent achievements. It's simplified web-based interface for project management, offers an improved user experience, allowing you to work from mobile devices.

Have a look at this foreman out in the field, busy talking to workers and clients, getting updates and new

Information. Online Planner allows him to work from a tablet enabling him to display, create and edit tasks in a Gantt and resources view. At any time, he can check the overall project status, as well as drill down to single tasks associated to a specific user, display associated documents or assign new resources to existing tasks.

Online Planner provides a faster and more user-friendly way to interact in real time with an existing project plan created and maintained on SAP Portfolio and Project Management. For example, there is a 40% reduction in data entry time to update a project plan compared to SAP PPM. There are 44% fewer screens and 44% fewer clicks necessary.

The SAP Cloud Platform makes the solution highly adaptable, while at the same time enabling very fast implementation in an agile process. Dive into the details of Online Planner and get to know Accenture Liquid Studio for SAP Leonardo. Turn your ideas into reality through a fast and agile innovation process.
