SICK LEAVE MANAGEMENT APPLICATION

In a world of work that's quickly changing, how can HR innovate and take advantage of digitalization? The answer, Accenture Liquid Studio for SAP Leonardo. From idea to creation, we help our clients rapidly build tailored applications that complement their core business and take a people first approach to redefining HR.

That's how SAP Leonardo and HR data were partnered to create the Sick Leave Management application. Seamlessly integrated with SAP SuccessFactors the application brings optimization and efficiency to Leave Process Management. Enhanced UI creates a smooth user experience, allowing companies to manage fully customizable and complex approval workflows. Employees can follow their requests every step of the way, from employee submission with supporting documentation, to medical team and, ultimately, to manager. The request follows each level of validation until the final status becomes available to the employee.

Leave requests simplified. Now that's smart. And with Liquid Studio for SAP Leonardo, it's easy to go from idea to competitive advantage in a matter of weeks adding value to your organization at scale, with speed and agility. Help HR jump into the digital Renaissance and keep your enterprise on course with Accenture Liquid Studio for SAP Leonardo.
