Tech Vision 2019

DARQ Power

Understanding the DNA of DARQ

Imagine a movie audience

fully immersed in the on-screen action
through virtual reality.

Human-like, artificial intelligence characters
will respond, anticipate, react
to each of the audience's choices.

Meanwhile, distributed ledger technology
will make payment and access seamless.

This may seem far off,
but companies are already setting their sights
beyond their current digital transformation.

Future-minded leaders know that
mastering the next set of technologies
will give them every advantage.

Distributed ledger technology (DLT)

Artificial intelligence (AI)

extended Reality (XR)

Quantum computing (Q)

New technologies can spark a step change.

Is your business ready for what's next?
