DevOps Automation for SAP on AWS: Transforming to Intelligent Operations

Most SAP deployments and operations are manual, time-consuming, prone to human error and not standardized.

The result? Delivery issues, compromised quality, unexpected delays, unplanned downtime and high operational costs.

Accenture can help transform your SAP core, pivoting to intelligent operations by accelerating migration to AWS, reducing infrastructure costs, freeing up investment for innovation, growth initiatives and faster time to value.

Because running critical SAP application workloads on AWS helps streamline the ability to integrate SAP with traditional services and emerging technologies including next generation automation.

Introducing: Accenture DevOps automation tools for SAP on AWS.

A suite of tools to help automate SAP deployments and operations. Going from day zero deployment, to landscape life-cycle management, optimized infrastructure consumption, automated SAP Basis and infrastructure operations and a single pane of glass monitoring across the stack.

With our industry-leading automation solution, you benefit from:

Always-on leading practices

We manage and continuously maintain SAP and AWS leading practices in the tool, so you get the latest lessons learned from the ground, and up-to-date features.

Reduced time to market

SAP landscapes can be deployed in a matter of hours;

Reduced deployment and run costs, as well as increased service reliability

Pay for non-production systems when you need them, with automated SAP application level start/stop.

Size for steady state and auto-scale automatically, based on real business usage, and remove reduce manual errors and operations costs by leveraging scripted best practice SAP Basis and infrastructure operations.

Increased compliance and auditability

Our template-based approach means you can meet compliance requirements, and since everything is defined as code, you benefit from a real-time, up-to-date configuration management database.

Together, Accenture and AWS can help you implement SAP and cloud infrastructure at extraordinary speed, scalability and with unprecedented consistency.

For the market-changing, end-to-end solution of tomorrow choose Accenture DevOps automation for your SAP deployments on AWS today.
