

## ACCENTURE FEDERAL CYBER CENTER VIDEO

In today's digital world, your operations are becoming more agile every day. Driving more mission impact by making more data available across more devices to more users than ever before.

The catch? An increasingly larger attack surface that today's sophisticated adversaries are targeting to find their way in. You need a different approach to cyber resilience today. Start right here. Right now.

At the Accenture Federal Cyber Center, we have fused together deep cybersecurity expertise with Artificial Intelligence, Machine Learning and Advanced Analytics Tools that allow us to know, emulate, outpace and eliminate threats in real time.

We use our repository of 18 million known bad actors, malicious IP addresses and viral code snippets to identify threats as they're happening.

Our DoD and Intel trained cyber operators are equipped with advanced tools to mimic and emulate the most advanced nation state adversaries to test and improve your defenses.

We evict adversaries from your system in seconds, not hours using advanced automated response solutions powered by data analytics, artificial intelligence and machine learning.

The future of your mission is leaner, faster, more agile. It's a world of data acceleration that provides great opportunity and comes with even greater risk.

It's time to up our active defense game and demand cyber resilience.

Here at the Accenture Federal Cyber Center. We're ready. Let's get started.
