Accenture Technology Careers

Recruitment

Can you make the daily commute easier for millions?

Brittney, Business & Systems Integration Analyst: Presto is tangible, I can see its impact to the community, it's just made commuting so much easier for everyone within the city and outside of it. Presto is an awesome project that I am really glad to be a part of.

Presto is about really integrating transit systems that were previously unconnected.

Arsalan, Business & Systems Integration Senior Manager: Toronto is a vast locality and there are many different municipalities, many different geographies.

Urooj, Business & Systems Integration Manager: You have this one method of payment which is your Presto card and you can tap and go. Travel through several service providers not having to have a specific ticket for that particular service provider.

Taylor, Implementation Manager: Being able to manage that card online, be able to reload it both at customer service outlets as well as on a website.

Chris, Business & Systems Integration Consultant: It is really being able to bring our transit system right now to the next level to where it should be at.

Brittney, Business & Systems Integration Analyst: I think that there are a lot of different skills that are important for the project.

Arsalan, Business & Systems Integration Senior Manager: The technical skills that we bring to the table, a lot of digital mobility skills.

Taylor, Implementation Manager: And hardware and devices...

Arsalan, Business & Systems Integration Senior Manager: Risk Management, client satisfaction, my skills evolved.

Urooj, Business & Systems Integration Manager: So today I might be working on requirements, tomorrow I am working on testing.

Taylor, Implementation Manager: You know on a daily basis I'd be dealing with how to wire up a device or how to network on a bus.

Urooj, Business & Systems Integration Manager: You're constantly being pushed, you know every project is different from another.

Brittney, Business & Systems Integration Analyst: I've had the opportunity to work with a diverse group of people, work with people where they make me feel like I am really contributing to the team.

Chris, Business & Systems Integration Consultant: The moment I came in, everyone is like okay Chris how can I help you?

Taylor, Implementation Manager: We all want to achieve greatness in both ourselves and also for our clients.

Arsalan, Business & Systems Integration Senior Manager: And always making sure that the client is the primary focus.

Urooj, Business & Systems Integration Manager: If you are looking for a place to grow.

Brittney, Business & Systems Integration Analyst: If you're looking to do you know transformative work.

Urooj, Business & Systems Integration Manager: And you're looking for an amazing opportunities and great people to work with.

Brittney, Business & Systems Integration Analyst: Then Accenture is the place to be.
