Accenture Hybrid Cloud Solution for Microsoft Azure

Under pressure to become more agile and unlock their ability to innovate faster, enterprises want to tap the full potential of the cloud to integrate the capabilities needed to become digital businesses. What’s needed? A cohesive, integrated approach to the hybrid cloud. Accenture and Microsoft are co-engineering a powerful enterprise-grade hybrid cloud platform that will unlock a new level of cloud capability for the enterprise. The Accenture Hybrid Cloud Solution for Microsoft Azure helps enterprises smartly connect the intelligent capabilities needed to become a digital business, aligning the agility and economics of cloud computing with the reliability and security of on-premise IT environments.

Accenture Hybrid Cloud Solution for Microsoft Azure provides an end-to-end enterprise-grade hybrid cloud platform that will unlock a new level of cloud capability for enterprise clients, and ease and accelerate enterprise-wide cloud adoption.

### The Solution

#### Strategy

- **Transformation and Deployment**
  - Migration to the latest cloud technologies
  - Mitigate risk
  - Accelerate and innovation
- **Hybrid Cloud Transformation**
  - Transform, business processes and infrastructure
  - Mitigate risk
  - Accelerate and
- **Physical Workloads**
  - Enterprise-Grade Operations
  - Control, and business performance, costs
  - Continually optimize
- **Enterprise-Grade Services**
  - Optimize
  - Create a new class of applications
  - Discover application and infrastructure workloads, assess
  - Assess an entire virtual estate.
  - Move and manage IaaS and PaaS
  - Auto-scale, burst and dynamically
  - Move and manage IaaS and PaaS
  - Discover application and infrastructure workloads, assess
  - Assess an entire virtual estate.
  - Move and manage IaaS and PaaS
  - Auto-scale, burst and dynamically
- **System Management**
  - Drive cost efficiencies and opportunities
  - Secure the entire virtual estate.
  - Cost efficiencies and opportunities
- **Interoperability**
  - Interoperability
  - Federated billing management
  - Federated billing management
- **Portfolio Optimization**
  - Efficient and effective.
- **Enterprise-Grade Applications**
  - Deliver advanced billing analytics,
  - Automate and control
  - Deliver reliability, governance,
  - Manage and control

### The End-to-End Spectrum of Services

- **Software Platform to orchestrate, govern and manage**
- **Cloud Tooling**
  - Software platform to orchestrate, govern and manages
  - Cloud Tooling
