

High performance. Delivered.

Accenture Hybrid Cloud Solution for Microsoft Azure

Video Transcript

Pierre Nanterme
Chairman and CEO,
Accenture

Hello. I am Pierre Nanterme, the Chairman and CEO of Accenture. And I am delighted to announce a new initiative that will help enterprises around the world realize the full potential of the cloud.

Through our longstanding and strategic relationship with **Microsoft**—and our joint venture in **Avanade**—we are excited to launch the new **“Accenture Hybrid Cloud Solution for Microsoft Azure.”**

This unique, enterprise-grade hybrid cloud platform is the result of an innovative product engineering collaboration. And it combines the complementary strengths of our three world-leading companies.

Our solution will unlock a new level of cloud capability for our enterprise clients ... enabling them to smartly connect all the capabilities they need to become truly digital businesses. It is integrated and orchestrated across the hybrid cloud ...

And it provides enterprises the power to deliver everything “as-a-service” ... with the flexibility to manage applications and active workloads between private and public clouds—in a seamless and automated way. With the Accenture Cloud Platform at its core, our solution also supports a multi-cloud, multi-vendor environment. So clients can run any application they want ... in any cloud ... in any way they choose—while still enjoying the peace of mind and reliability of traditional enterprise IT.

The result will give enterprises unprecedented agility and new capabilities to accelerate innovation ... to create more compelling customer propositions ... and to seize opportunities in new markets.

These benefits make our solution a game-changer that we believe will drive usage of enterprise-wide cloud into mainstream adoption. With the **Accenture Hybrid Cloud Solution for Microsoft Azure**, the enterprise cloud is truly coming of age. And the full promise of the digital world is becoming reality.
