How can we help?

Enhance productivity
Reduce the time it takes to create test data and simplify test and consolidation for more productive HR operations.

Lower costs
Reduce administration efforts with fast-start, cost-effective customization.

Increase compliance
Protect confidential employee information during testing and comply with data protection regulations.

Scale fast
Automate processes to gain agility and free up your HR teams to innovate and grow the business.
Today, each HR professional typically manages a multi-system landscape. Sensitive employee data must be secure, up-to-date and meet regulatory demands. With the SAP HANA® Cloud Platform, working in the cloud means businesses can scale fast and reduce costs. And by adding Accenture Clone and Test for Cloud, HR professionals have the right functionality to test and copy in a safe and secure manner.
Benefits

Fast
Rapid set-up reduces weeks or months to hours or days. Secure data is available fast, freeing up testing time.

Easy
Predefined anonymizing rules simplify set up and run. Copy your data in three steps with this easy to use tool.

Secure
The ability to anonymize data without having to leave SAP’s data centers protects your information.

Flexible
Flexible, practical software and the support of our experienced specialists frees up time for HR teams.

Backed by the knowledge that tests are using authentic employee data, HR executives gain the confidence to take fast, fact-based decisions that realize better business outcomes.
How it works

Whether copying master data within or across SuccessFactors Employee Central instances, Accenture Clone and Test for Cloud copies and anonymizes sensitive employee data.

HR personnel can select particular data sets and safely move those records in the cloud.

Disguising the data helps achieve a high level of anonymity.

Working in the cloud is cost effective and improves business scalability.

Copy
Our product copies data for SuccessFactors Employee Central and our wizard simplifies the copy process.

Anonymize
A predefined set of anonymization rules enhances safety and quality.
