

# TRANSFORM YOUR WORKFORCE with G Suite and Accenture

Create a culture of next-level collaboration and intelligent productivity

## Empower your next generation workforce with G Suite and Accenture

### Is your workforce...

- Spending time on inefficient, menial tasks (finding files, trawling through emails)?
- Investing more in untangling process and workflow duplication, rather than conceiving 'the next big idea'?

### The time to evolve your workforce is now, where success looks like:

-  Finding information, instantly/quickly: Emails. Files. Attachments. People. Company information.
-  Automating (and speeding up) processes and workflows.
-  Editing, sharing, discussing and collaborating, organisation-wide (and beyond) in real-time.
-  Simplifying administration and managing users, devices and data more securely and easily.
-  Uniting teams and maximising talent, regardless of location.
-  Empowering people to perform at their best.

## G Suite and Accenture: Gain the productive edge

### Bottom line results we've seen:

-  1.5% increase in revenue driven by G Suite
-  331% ROI driven by G Suite

(Results from a global conglomerate with 20K employees and \$3B in annual revenue)

### Working in true partnership, delivering real value.
