

DOCTORS SAVE LIVES—THIS TECHNOLOGIST DOES TOO

VIDEO TRANSCRIPT

MALEK BEN SALEM, Senior Principal, Accenture Labs

A lot of the time we spend in our lives is at work, and I started thinking about how to make that work meaningful, so that I'm proud of it at the end of my life. I started thinking about my work as an engineer and how could that be meaningful, versus the work of doctors who are helping save lives.

So, I had a hard time finding meaning for that work until I transitioned to a new career in cybersecurity, and I realized that through the work that we do, particularly securing medical devices, how meaningful that could be. An insulin pump or a heart pacer, securing that device could mean saving the life of the patient.

So you don't have to be a doctor to find meaning for your work, you can be a technologist. You can be a cybersecurity expert.
