

# COOLEST JOB EVER MEET SUPREYA

## VIDEO TRANSCRIPT

Hi everyone, my name is Supreya Kesavan and I'm currently a technology senior analyst based in our Boston Massachusetts office. You know, my day-to-day can really vary a lot I'm about to get my first call with my offshore team in India and so we really are a global collaborative company. I get to work with developers, designers, business analysts all in one area.

I've made some of my best friends just during my two years here so far and I've never been told that I can't express myself, be myself.

It's been two years in my Accenture adventure and I can't wait for more.

So today I'm helping lead a design thinking workshop with an eco twist so we're looking at international perspectives and environmentalism since I'm very passionate of environmental work I really wanted to translate that into my young professional life.

I'm standing in the heart of the Boston innovation hub and innovation is really the heart of Accenture. It's the favorite part of my job. Get in a room with some of the most intelligent people that I know and just get to think outside the box.

This area here is our nano labs. There's just an endless amount of gadgets and things to show our clients the art of the possible for the future.

This week I'm working from Dallas which is a really nice perk of our job is that we're just able to work and be as flexible as we need to be.

When I was coming through my recruiting process I was so amazed by how unique and different and just frankly wonderful everyone is.
