

# INDUSTRY X.0: DRIVING THE DIGITAL REVOLUTION OF INDUSTRY

## VIDEO TRANSCRIPT

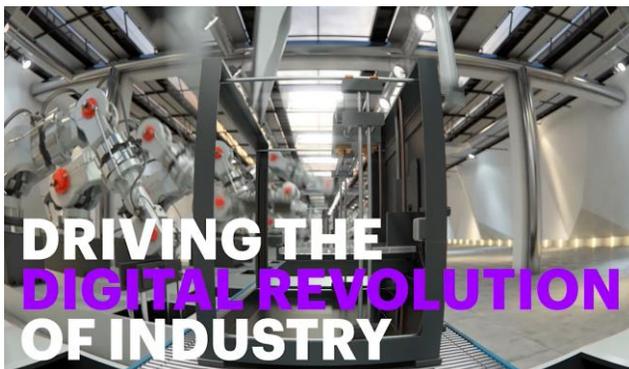

[introduction]

Katie: One thing that I think that's really unique about being in Industry X is that the people there aren't afraid to try something.

Mark: By 2025, what would a plant look like? What type of technologies would you be using daily?

I think it's really important to find new ways to think about how things are done, in industrial environments.

Allison: Being at the forefront of an industrial revolution with Industry X.0 is super exciting - it's great to be able to help clients think outside the box.

Alen: Industry X.0 is all about innovation. A lot of things that people thought could only be far, far out in the future, we're making it happen now.

Alen: Let's sit down. Let's spend a few days. Let's just use the white board and we'll just come up with things...and then actually touch and feel what innovation would look like.

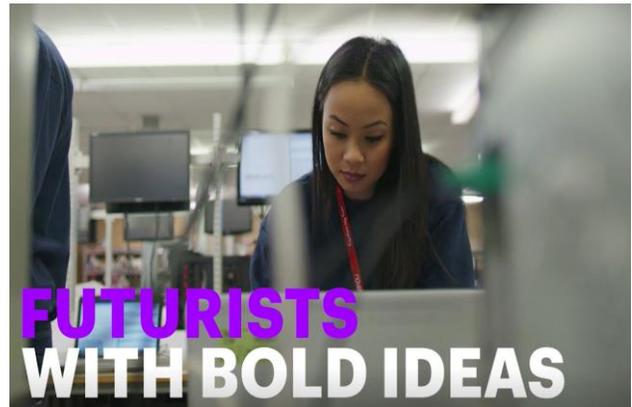

(interlude)

Brooke: What motivates me daily is being around the ingenious people that we have.

Peter: There are, for example, uh software developers, automation engineers, mechanical engineers, so its a really colorful team.

Barnabas: Collaboration is very important especially in a mixed team.

Emily: I have people on my team right now from the U.S., Canada, India, Romania, France. And everyone knows to reach out so I think that gives us a nice diverse opinion and the ability to influence projects on a global scale.

Katie: We love working together, we love celebrating our wins together.

Garai: It's the team members, always. Getting the right people to do the right thing and finding the right people for the right positions.

(interlude)

Barnabas: We set our own challenges so basically the limit is our own imagination.

Davide: Each of us have a great opportunity to tell the customer's story by leveraging what are their talents.

Reding: Being up to date on everything that is moving in the technology world. I love it.
