

ENTERPRISE WORKLOAD AND DATA MIGRATION MADE EASY

A rapid move to Google Cloud with Accenture

Push computing limits. Harness data insights. Drive results sooner.

500,000 workloads migrated (and counting) leveraging Accenture's migration tools and methodology. Work with the right partner, with the capabilities and the expertise, to make your cloud journey swift, smooth and secure.

A solution that's scalable.

Services that meet your individual size, demands and varying capacity requirements.

Business agility, now.

Move apps to Google Cloud Platform, utilizing next-generation automation and deployment technology.

Proprietary features and advanced methodologies.

Accelerated migration and optimization of your application estate.

Powerful data and analytics.

Robust cloud features in AI and machine learning make finding answers faster, building better products possible, and fueling inspiring applications.

Journey to the Cloud

The 3 key phases of cloud migration explained:

1

Strategy, assessment and roadmap.

Defining your strategy, vision, target architecture and roadmap. Imparting insights and prioritizing planning to maximize cloud capabilities.

Result

Your business, in the cloud, sooner.

2

Cloud transformation and migration.

Providing the tools and processes for moving and modernizing applications, building cloud-based apps and infrastructure.

Result

A new operating model for your business for innovating more quickly, effectively and efficiently.

3

Cloud management and optimization.

With a Cloud Management Platform (CMP), fostering innovation while providing services and advanced analytics for precision cost control, governance, security and accountability.

Result

Optimizing your cloud investment. Equipping you with the confidence to manage your cloud environment and legacy assets.

Stay ahead of the competition

Accenture Enterprise Cloud Services. Accelerating your company's digital transformation and empowering your business.

Getting your roadmap right

Navigating implementation and migration

Managing cloud services effectively
