

ACCENTURE AND UPWARDLY GLOBAL SUJAN'S STORY

VIDEO TRANSCRIPT

Starting over in a new country is overwhelming. It requires tenacity, hard work and adaptability. That's why Accenture and Upwardly Global are using the power of digital to support skilled immigrants and refugees building their careers in the United States.

Sujan Guruacharya
Senior Analyst
Accenture Broadcast

Upwardly Global gave me everything I needed to build my career here in the US. Life in Nepal is pretty hard. I was fortunate enough to get a job, but there was no room for me to grow. My first job in the US: it was in a donut shop. It was not using my skills at all. I was really unhappy, and I decided that I wanted more. I started handing out my resumes to my regulars and asked them for advice. I went for a job interview, and the interviewer realized I was overqualified. She suggested to apply for Upwardly Global, and that's when it all started.

George Levar
Director
Accenture Broadcast

Accenture was holding a mock interview session for Upwardly Global, and my chief engineer was volunteering for that. And the organizers put Jim and Sujan together because they both had video and broadcast in their background. Jim suggested that he apply to some open tech director positions that we had.

Sujan Guruacharya

After a couple of interviews, the next thing I know, I have a job in Accenture.

Chris Wedig
Director
Accenture Broadcast

Sujan is one of the many wonderful Upwardly Global hires here at Accenture. He took a huge gamble coming to this country. By chance, we found him. It has been one of the best hires we've ever made.

Sujan Guruacharya

To me, Accenture is a learning hub. I learn a new thing every single day. I am especially proud that Accenture helped Upwardly Global to come up with their online training program, which is very, very beneficial.

Upwardly Global and Accenture both believed in me, and I'm really thankful to them.
