

ACCENTURE FEDERAL PRECISION RECRUITING SOLUTION

VIDEO TRANSCRIPT

Our military needs the best and brightest recruits available to face new and challenging missions ahead.

Military recruiters need the best tools available to attract candidates through a connected, personalized, and convenient path to their next career.

Accenture Federal Services created the Precision Recruiting Solution to connect candidates and recruiters through a digital experience in sync with how they communicate in their everyday lives.

With the Precision Recruiting Solution, a new recruit's information is entered digitally - through a website, by onsite recruiters using laptops or tablets, or on the recruit's mobile device.

New recruit information is instantly added to a recruiting database, de-duplicated and automatically evaluated using predetermined criteria for identifying the best candidates.

Only the most qualified candidates are passed on to recruiters for follow-up.

Candidates are contacted automatically within 72-hours and recruiters stay connected throughout the recruiting process using email, text messaging and social media, which are all integrated in the Precision Recruiting Solution.

The Precision Recruiting Solution features a self-service portal, giving candidates a fast and easy way to enter information and digitally sign MEPS package forms.

This reduces repetitive, manual steps that can cause candidates to abandon the recruiting process.
