INTELLIGENT CLIMATE

SPEAKER: Intelligent Climate is an end-to-end solution based on SAP Leonardo Machine Learning and IOT Services to manage heat, ventilation and air conditioner system through a modern tech module.

SPEAKER: This solution comprises two key components. One is the modernization of the legacy on-premise kind of control system by using the latest SAP IOT Technology On-Cloud. The second one is a change of power line from hard rule based climate control to a system over by artificial intelligence and reverberates in comfort and vision and energy efficiency.
