

INTELLIGENT CORPORATE DASHBOARD

VIDEO TRANSCRIPT

In a world where data drives the decisions for success, accurate and timely information is critical to staying competitive.

From Financial indicators, customer analysis and procurement to workforce and talent management, being in the know ensures you can operate with speed and efficiency.

The key?

Turning information into insights, facilitating prompt and effective action.

With Accenture's Intelligent Corporate Dashboard, powered by SAP Leonardo, the intelligent enterprise now has all the information at hand to make the right choices.

It's a comprehensive dashboard that supports C-level strategy discussions and provides a unified view across the lines of business.

The Digital Boardroom connects multiple data sources, combining them for a real-time, 360-degree, single analytics view.

Designed for collaboration, it offers a new way to visualize organization details, identify challenges and opportunities, and brainstorm solutions—leveraging the built-in planning simulations, guided machine learning discovery and predictive analytics.

Leadership can now review best-practice content and compare trends and become empowered to meet the challenges of

changing business environments, and ensure targets are aligned with the roadmap.

While the CEO can present the annual performance the CMO can demonstrate customer sentiments obtained from market intelligence.

The CFO can access real-time financial performance data, the COO can walk everyone through operations and the CHRO can show how workforce and recruitment is meeting KPIs.

With an intuitive interface for interactive data visualizations, the Intelligent Corporate Dashboard supports conversations, allowing leaders to drill down into the details, and use planning and simulation to explore alternative courses of action.

Accelerate your enterprise decision-making with intelligent insights.
