PAULA – PROCUREMENT AUTOMATED LEARNING ASSISTANT

For businesses it has become essential to digitally transform day-to-day activities in order to streamline procurement processes and stay ahead in the industry. As procurement specialists, completing mundane tasks takes way too much time. You have to wait for the system to load the information you need, manually track down requisitions and verify data every single day. Organizations need to transform their tasks into value-added work.

Meet PAULA, your Procurement Automated Learning Assistant. With PAULA, you can now enjoy a more intuitive buying experience and a faster way to get reliable information from your SAP Ariba landscape. She is a system. She can help search catalogs in Ariba and lookup or check the details of requisitions, from approvals and escalations, to follow-up documents.

She is intelligent. With simple queries, you can easily get answers to frequently asked questions related to the procurement process. She is conversational. You can talk to PAULA by typing a message or talking through the voice chat mode.

I wondered NPR costs?

Now, you can focus on more strategic activities. The cost of procurement is reduced, risk of error is minimized and compliance is improved. Bring this tool into your existing system and add this track capability. With PAULA, you can enjoy a faster, smarter and more intuitive buying experience.

Meet the face of future procurement. Meet PAULA.
