

Accenture Perfect Product Delivery

A new service to deliver efficient and effective transportation optimization and management for CPG companies

In the current state of the economy, challenges posed by rising shipping and warehouse costs threaten to deflate margins of manufacturers

Planning and Optimization

Execution

How Accenture Perfect Product Delivery can help

Optimization

- Saves manufacturers money by:
- Reducing small deliveries through minimum order quantity and delivery frequencies
 - Selecting transportation modes
 - Negotiating tariffs and selecting carriers
 - Maximizing multi-drop/multi-pick for load consolidation and optimized routes

Accenture Perfect Product Delivery reporting and analytics provide:

- Value added recommendations that support and improve logistics configuration, carrier sourcing and negotiation

Cost KPIs and Service KPIs:

- Continuously improve service
- Demonstrate compliance
- Provide external reports

End-to-End Process Track and Trace

Real-time, Web application monitors deliveries 24/7:

- Ensuring service and carriers compliance through different channels
- Meeting customer demands
- Allowing immediate changes and adjustments

Auto-invoicing:

- Simplifies the management of complex rate conditions
- Ensures accuracy of complex shipping parameters
- Provides support in generating and submitting Import/Export documentation

Analytical/Actionable Insight
