

JOURNEY TO ORACLE AUTONOMOUS WITH ACCENTURE

VIDEO TRANSCRIPT

00:00

[MUSIC PLAYING]

00:07

Leadership and end users have a lot

00:09

of expectations for our data center modernization,

00:12

and it was on me to meet them.

00:15

Our workloads were so unique, we thought they

couldn't possibly

00:18

run on the cloud.

00:20

My team had heard a lot about Oracle's Autonomous Database

00:23

but needed some additional expertise to make the leap.

00:27

Accenture has a reputation for successful Oracle migrations.

00:30

We like that they have tools to enable efficient cloud

00:33

migrations tailored to our workloads.

00:36

The more questions we asked, the better we felt.

00:38

Accenture had clearly encountered our concerns

00:41

before.

00:42

Their tools and experience helped

00:43

us cover all the bases, no matter what existed

00:46

in our Oracle environment.

00:48

When it was time to get started, Accenture

00:50

helped us define our strategy and architecture,

00:52

providing a rock solid business case to move to Oracle Cloud

00:55

immediately.

00:57

Accenture migrated us from a scattered data center

01:00

to a consolidated autonomous platform.

01:04

Now that our data is in the cloud,

01:05

we can spin up or spin down our capacity on demand,

01:10

giving us more speed, innovation, and flexibility

01:13

than we ever had in our on-prem environment.

01:17

Oracle Autonomous Database gave us

01:19

the peace of mind we needed to stop worrying

01:21

about patching and upgrades.

01:24

Across the business, we've continued

01:26

to optimize costs and respond to new requests faster than anyone

01:30

expected.

01:31

Ultimately, we've exceeded our leadership and end user

01:35

expectations.

01:36

Accenture's ability to drive our strategy,

01:39

implement our technology, and support our operations

01:42

created the recipe for success.

01:44

Today, our Oracle Cloud programs are delivered

01:47

at the speed of autonomous.

01:49

So reach out to Accenture to discover your own journey

01:53

to Oracle Autonomous.
