00:25–00:49

At Accenture's Intelligent Finance & Accounting Operations, we help transform finance from transactional to strategic with an intelligent operating model by leveraging data, new intelligent technologies and talent to deliver insights and analytics. This helps our clients and companies to become more agile, generate value quickly, increase savings and achieve a competitive edge.

00:50–01:38

We provide a range of services to our clients including:

- Procure to Pay: where we help clients manage payables lifecycle by increasing vendor compliance, taking advantage of discounts, and confirming pricing and terms prior to payment.
- Order to Cash: here, we manage the client's cash flow and working capital by providing real-time visibility and end-to-end management of the collections and cash lifecycle.
- Record to Report: where we help clients improve operational efficiency and balance sheet integrity, help them cut time to close and safeguard them with regard to compliance and regulatory requirements.
- Financial Planning and Analysis: where we use data and analytics to improve forecasting accuracy and provide business insights.

01:39–02:10

Our clients comprise of 95 of the Top 100 companies and a third of the Fortune 500 companies.

They expect excellence from us, and we deliver it through talented finance professionals and subject matter experts.

We hire some of the best talent in the industry across Finance & Accounting, Project Management, Risk and Analytics, and more.

Being a part of Accenture means that you would receive the best-in-class training to help you further develop as an outstanding professional, team player and a leader.

02:11–02:34
