

ACCENTURE INTIENT SUMMIT HIGHLIGHT VIDEO TRANSCRIPT

MIKE STAPLETON:

Today was our first cross R&D INTIENT summit. We had 200 attendees, attendees from all pharmaceutical companies, from business, from IT, leaders sharing, talking, experiencing what it really could be to really innovate across this whole industry.

GENE REZNICK:

This is my first time attending the INTIENT Summit. And a couple of things that strike me. I mean, first of all, just the representation of a lot of our clients here is fantastic. I think there's over 100, 150 clients with us today, spending the entire day, and then a whole day tomorrow, going through what's important to them, understanding where our solutions are going, jointly collaborating, co-innovating around some important topics. That's super powerful.

STUART HENDERSON:

It's been a great day. I think there's three things which I'd really single out. First is it's been great for me to see what a great collection of clients here today, really extraordinary group from the industry-- some of the best-- combined with a whole ecosystem of our partners. I couldn't have enjoyed it more, being around all these people. They bring great ideas.

ALEX SIMMONDS:

We've had a lot of great connections today between some key leaders and key thinkers in the space. And I really enjoyed meeting with colleagues. And I think that the connections that we make here today-- even, in the short term, you may not know the value that you create--

over the long term, I think we'll keep coming back together.

MIKE STAPLETON:

We had a tremendous engagement today, I would say all morning, around the discussion around patient centricity-- amazing passion. But also, you know, many different points of view depending where you're coming from, whether you're very senior in the C-suite or whether you're a scientist, technology, IT professional.

RAHUL KABRA:

The summit and the coalition we have with our clients is really, I think, a fantastic, unique opportunity for our clients to learn from each other. I think that's one of the things I find most powerful is they're talking to each other about the challenges. And what amazes me is their willingness to share and be open about the similar challenges they have and how they want to accomplish them.

STUART HENDERSON:

Seeing all these projects that some of our clients have done. They're inspiring. Frankly, what's possible with the INTIENT platform today, already, is incredible.
