

TSI AND ACCENTURE ABOUT IT CAREER

VIDEO TRANSCRIPT

[00:00:12]

Thanks for coming. It's my pleasure. What is new here? Well I guess, I mean, we meet to pretty often, so you probably didn't miss too much. More or less the same trends remain, also our business is being impacted by artificial intelligence. Industry growing quite a lot. I'm pretty sure it will continue to grow. Our analysis shows that we need to have three times more graduates that we have today.

[00:00:40]

My name is Alice Dinko, I recently started PhD. The work is very interesting, you have possibilities to grow across different tools, industries and clients.

[00:00:54]

From your perspective as a teacher, as a professor - so what does it take for people to switch from being users of technology into being, you know, creators of technology? Do you see a big difference in the mind shift or a skill shift?

[00:01:18]

The majority of other students are killing out of this area. They already can program something; they are users of software. We have virtual laboratory equipment, which gives the best world level approach to some solutions. We have special professional courses, for example, Cisco courses. After graduating our graduates are ready for employment.

[00:01:35]

What I want to tell about - Transport and Telecommunication Institute, why I joined it and started there all my professional years. It is that they have solid and powerful technical knowledge about innovations, different technologies. They have interesting programs; they are very close cooperating with IT companies.

[00:02:03]

Join IT because it's around us, because it's interesting and it grows and changed every day.

[00:02:08]

So may I say that our successful graduates will have granted to be employed for decades. Yes, thank you very much. Thank you.
