

GAINING INSIGHT AND CONTROL INTO HR DATA

VIDEO TRANSCRIPT

As every HR professional knows, employee and payroll data is the lifeblood of any organization.

And when time is of the essence, you need your data to be accurate, first time, every time.

Especially when your HR team is handling data in the cloud from many different locations.

Accenture HR Audit and Compliance as-a-service is a software extension for SAP SuccessFactors that helps you to find and resolve inaccurate data, simply and swiftly.

Powerful analysis helps you translate data into meaningful insights, giving you practical and accurate key performance indicators that make a difference to your business outcomes.

So you can handle downstream processes, such as payroll processing or verifying the data, far more efficiently.

Being in the cloud means you can scale fast to meet the needs of your growing business. And by drawing on a catalogue of more than 750 sample rules, you can fast-track the software set up with limited effort.

Accenture HR Audit and Compliance as-a-service is different by design, making the best of your SAP SuccessFactors environment and bringing you new, one-of-a-kind value.

It helps you to “know what you don’t know” to improve your data quality, ease compliance with essential regulations, and give you the security, transparency and traceability your HR operations deserve.

This is just one of the solutions from Accenture Software for Human Capital Management – helping your HR teams today and tomorrow.
