AI 101: WHAT IS MACHINE LEARNING

VIDEO TRANSCRIPT

[00:00:01]
>> What is machine learning. Let's say you're about to face the big boss in a videogame you charge forward and get flattened next time you might try pausing 1st and not getting flattened. You're learning and improving until finally you can beat the level. That's the idea behind a machine learning a form of artificial intelligence traditional computers can't fix problems on their own but with machine learning they can learn from past data past results and make better decisions in the future on lots and lots of scenarios at once to improve at incredible speed to.
