RISE WITH SAP. SOAR WITH ACCENTURE.

Change is now. Moving to the cloud is not a matter of when but how fast.

What organization, what industry would say no to a boost in efficiency, service levels, speed to market, resilience, agility, sustainability and the opportunity to innovate and reinvent business models and processes that cloud brings?

A no-brainer, but not necessarily easy, or a one-size-fits-all proposition.

Our research shows that nearly two-thirds of the organizations that have made the move, haven't received the results they expected.

We want to change that. With SAP, we are helping clients navigate the choices, define the best approach for their circumstances, and jumpstart their business transformation.

RISE with SAP packages a powerful cloud engine. SOAR with Accenture brings the industry know-how and accelerators to get to value faster.

With SAP we are developing a pioneering portfolio of ground-breaking industry solutions.

Our co-development programs span SAP S/4HANA, customer experience, industry cloud, sustainability, industry X and more.

We are adding more industry cloud apps on SAP Business Technology Platform.

SOAR with Accenture combines our industry content, cloud expertise, extensibility architecture and end-to-end delivery services, optimized for deployment with RISE with SAP.

All driven and delivered by myConcerto, our market-leading transformation delivery platform covering more than 25 industries.

Unlock the potential of cloud. Be more agile, more resilient, more innovative.
