

ATLASSIAN CLOUD ENTERPRISE OVERVIEW

VIDEO TRANSCRIPT

In an increasingly digital world unlocking the power of cloud is key for enterprises to stay competitive, not just for today but also for the future.

Atlassian Cloud Enterprise is built with global scale enterprise grade security and admin efficiency in mind to power your teams with Jira software, Confluence and Jira Service Management.

Large distributed teams need the agility to grow quickly while minimizing disruptions and downtime.

With Atlassian Cloud Enterprise, unlimited instances give different teams and geographies the autonomy to manage and customize their instances based on their unique team needs or security standards.

Atlassian Cloud Enterprise is backed by a 99.95 uptime SLA and a dedicated 24-7 enterprise support team to ensure the highest standards of reliability.

Security is paramount to our platform and is built into the fabric of our products infrastructure and processes so you can rest assured knowing your data is safe.

With Atlassian Cloud Enterprise you'll have control over where your data is hosted to help comply with regional guidelines and reduce the risk of data breaches by connecting with your existing single sign-on provider.

Additionally, you'll also have access to a comprehensive audit log to triage suspicious activity are you managing thousands of users across multiple products.

With Atlassian Cloud Enterprise you will now get a centralized admin hub for efficient user management.

You'll be able to change access permissions, manage roles, and automate user provisioning with built-in connections to leading identity providers, all in one place.

Cloud Enterprise also enables efficient change management use a safe isolated sandbox to test configuration changes so you can confidently roll out updates to production and utilize release tracks to bundle releases as necessary.
