

MIGRATION MANAGER MAKES ATLISSIAN CLOUD MIGRATION SEAMLESS

VIDEO TRANSCRIPT

Change.

It doesn't have to be a messy job

Meet migration manager our unique process

First your data

It's not moved in one big lump

Instead we take a small project

And with the help of bots field map and duplicate it to the new platform

After testing we use that template and scale up factory style

From files to projects to entire systems

Securely within your own firewall

Next your people

Crucially we don't interrupt their work

Like the test project we train one team

And when they're happy we upskill everyone on demand

A new platform with new opportunities

Unlock capabilities

And tap into the latest technologies

Finally

Archiving or no actually

Your old world is in parallel with the new

With up-to-date information flowing

But as the duplication included all historical data the old platform can safely be retired

There's no need to maintain it

So with everything switched that's it

Migration manager does it all

End to end

Any platform to any other

From on-prem to the cloud

Minimal disruption zero downtime

And no data loss all this

Managed by a small team of specialists

Supported by our global expertise 24 7.

Welcome to your new world

Faster resilient and future ready

Migration manager seamless change for seamless customer experiences
