Everest Group Healthcare Payer Operations PEAK Matrix® Assessment 2023

Focus on Accenture
July 2023
Introduction

The healthcare industry is characterized by rapid changes and constant evolution, making it crucial for organizations to continuously adapt and enhance their fundamental capabilities. The increased push toward value-based care has presented various opportunities that have gained prominence, including telehealth, population data analytics, remote patient monitoring, commercial models based on risk assessment, increased investment in care management in general, and a greater emphasis on digital initiatives, particularly automation and analytics. To achieve these objectives, healthcare service providers are forging robust partnerships within ecosystems, collaborating with top third-party vendors, developing innovative technological solutions, and implementing novel approaches such as Business-Process-as-a-Service (BPaaS) and payvider solutions for service delivery.

In this research, we present an assessment and detailed profiles of 29 healthcare payer operations providers featured on the Healthcare Payer Operations PEAK Matrix® Assessment 2023. The assessment is based on Everest Group’s annual RFI process for the calendar year 2023, interactions with leading healthcare payer operations providers, client reference checks, and an ongoing analysis of the healthcare payer operations market.

The full report includes the profiles of the following 29 leading healthcare payer BPS providers featured on the Healthcare Payer Operations PEAK Matrix®:

- **Leaders**: Accenture, Cognizant, Conduent, EXL, Firstsource, Sagility, NTT DATA, Optum, and Wipro
- **Major Contenders**: Access Healthcare, Capgemini, Concentrix, Evolent Health, Exela Technologies, Gainwell Technologies, Genpact, HCLTech, Infosys, Mphasis, Omega Healthcare, Smart Data Solutions, Shearwater Health, Sutherland Global Services, and WNS
- **Aspirants**: CGI, Hexaware, Sunknowledge Services, Vee Technologies, and Viaante
**Everest Group Healthcare Payer Operations PEAK Matrix® characteristics**

**Leaders**
We recognize nine providers in the Leaders category – Accenture, Cognizant, Conduent, EXL, Firstsource, NTT DATA, Optum, Sagility, and Wipro.

- Leaders have established themselves as front-runners to support healthcare payers in their end-to-end operations value chain spanning product development, member engagement, network management, care management, claims management, and risk and compliance.
- These providers focus on ramping up their talent pools and technological investments to serve the increased demand for outsourcing. Talent shortages and cost pressures heightened by a growing demographic age are key reasons for this increased push in outsourcing in the healthcare payer space.

**Major Contenders**
Fifteen providers are positioned as Major Contenders – Access Healthcare, Capgemini, Concentrix, Evolent Health, Exela Technologies, Gainwell Technologies, Genpact, HCLTech, Infosys, Mphasis, Omega Healthcare, Smart Data Solutions, Shearwater Health, Sutherland Global Services, and WNS.

Major Contenders' coverage of the healthcare payer operations value chain is not as comprehensive as that of Leaders; however, they have consolidated their capabilities in specific areas of the value chain through investments in people, processes, and technologies.

**Aspirants**
CGI, Hexaware, Sunknowledge Services, Vee Technologies, and Viaante are recognized as Aspirants on the Healthcare Payer Operations PEAK Matrix®.

- Aspirants need to build a robust partnership ecosystem to enhance their technical and domain expertise and diversify their presence across buyer segments.
- Increasing their visibility among buyers by showcasing relevant case studies of serving specific buyer segments should be a focus area for Aspirants.
Everest Group PEAK Matrix®

Healthcare Payer Operations PEAK Matrix® Assessment 2023 | Accenture positioned as a Leader and a Star Performer

Everest Group Healthcare Payer Operations PEAK Matrix® Assessment 2023

---

1. Assessment for Capgemini, CGI, Concentrix, Evolent Health, Gainwell Technologies, HCLTech, Hexaware, Omega Healthcare, Sunknowledge Services and Vee Technologies excludes service provider inputs on this study and is based on Everest Group's estimates that leverage Everest Group's proprietary Transaction Intelligence (TI) database, ongoing coverage of the service providers, their public disclosures, and interaction with buyers.

2. The service providers who participated in two consecutive PEAK Matrix® assessments (2022 and 2023) have been considered for Star Performers rating.

¹ 12 months ending December 31 of any particular year, i.e., from January 1, YYYY to December 31, YYYY

**Recent acquisitions and partnerships**

- **2022:** acquired The Beacon Group, a growth strategy consultancy firm, which provides services to Fortune 500 companies operating in various industries such as technology, aerospace, industrial, healthcare, and life sciences
- **2021:** acquired Workforce Insight, a workforce management and human capital management advisory and technology and services provider
- **2021:** acquired Gevity to bolster its health transformation service capabilities in Canada and internationally
- **2021:** acquired Umlaut, an engineering consulting and services firm with a dedicated health and life sciences practice
- **2020:** acquired OpusLine, a Paris-based health consulting company to create a dedicated health practice in France

**Recent developments**

- **2022:** has ongoing investments in expanding the healthcare ecosystem. Accenture is developing new accelerators by incorporating the best tools in the market for task mining, process mining (Celonis), RPA Build/Config accelerator, quality management methodology and automation, analytics, intelligent health chatbot, health record integration, healthcare provider workflow accelerators, and voice transcription for clinical use cases. Key ecosystem partners for health operations include Amazon, Google, Microsoft/Avanade, Celonis, HealthEdge, Epic, and Oracle/Cerner
- **2022:** invested more than ~US$350 million over the past five years to develop SynOps, an AI-powered automation platform, which uses data and insights to transform how work gets done. SynOps allow companies to create more specialized roles, eliminate transactional work, and offer a better employee experience, thus helping them to attract the best talent and scale innovation quickly

### Strengths

- Accenture has a stronghold on core administration functions such as claims and network management. It has also expanded its support for clinical and care management processes, including clinical review audits, clinical appeals support, and case management.
- Accenture has expanded its healthcare ecosystem through investments in task mining, process mining, RPA, analytics, chatbots, etc. Some of the ecosystem partners include Oracle, Microsoft, and Celonis.
- The idea of bringing together different teams to offer a perspective on solving client’s problems under the One Accenture approach has worked in Accenture’s favor, allowing it to create a strong retention framework for its clients, which is further bolstered by SynOps.
- Buyers have highlighted Accenture’s digital services, domain capabilities, and training of resources as key strengths. They also highlighted the proactive relationship management offered by Accenture.

### Limitations

- Risk adjustment and STAR rating support services are gaining traction in the market. Although Accenture has made investments, it is relatively behind its peers in tapping opportunities in this segment.
- While Accenture is a diversified service provider, its premium pricing is an area of concern for clients. Referenced clients also expect Accenture to be more flexible during the seasons of high volume.
Appendix
Everest Group PEAK Matrix® is a proprietary framework for assessment of market impact and vision & capability

**Market impact**
Measures impact created in the market

**Vision & capability**
Measures ability to deliver services successfully

- **Leaders**
- **Major Contenders**
- **Aspirants**
Services PEAK Matrix® evaluation dimensions

- **Market adoption**: Number of clients, revenue base, YoY growth, and deal value/volume
- **Portfolio mix**: Diversity of client/revenue base across geographies and type of engagements
- **Value delivered**: Value delivered to the client based on customer feedback and transformational impact
- **Vision and strategy**: Vision for the client and itself; future roadmap and strategy
- **Scope of services offered**: Depth and breadth of services portfolio across service subsegments/processes
- **Innovation and investments**: Innovation and investment in the enabling areas, e.g., technology IP, industry/domain knowledge, innovative commercial constructs, alliances, M&A, etc.
- **Delivery footprint**: Delivery footprint and global sourcing mix
Everest Group confers the Star Performers title on providers that demonstrate the most improvement over time on the PEAK Matrix®

Methodology

Everest Group selects Star Performers based on the relative YoY improvement on the PEAK Matrix.

In order to assess advances on market impact, we evaluate each provider’s performance across a number of parameters including:
- Yearly ACV/YoY revenue growth
- # of new contract signings and extensions
- Value of new contract signings
- Improvement in portfolio mix
- Improvement in value delivered

In order to assess advances on vision and capability, we evaluate each provider’s performance across a number of parameters including:
- Innovation
- Increase in scope of services offered
- Expansion of delivery footprint
- Technology/domain specific investments

We identify the providers whose improvement ranks in the top quartile and award the Star Performer rating to those providers with:
- The maximum number of top-quartile performance improvements across all of the above parameters AND
- At least one area of top-quartile improvement performance in both market success and capability advancement

The Star Performers title relates to YoY performance for a given vendor and does not reflect the overall market leadership position, which is identified as Leader, Major Contender, or Aspirant.
FAQs

Does the PEAK Matrix® assessment incorporate any subjective criteria?

Everest Group’s PEAK Matrix assessment takes an unbiased and fact-based approach that leverages provider / technology vendor RFIs and Everest Group’s proprietary databases containing providers’ deals and operational capability information. In addition, we validate/fine-tune these results based on our market experience, buyer interaction, and provider/vendor briefings.

Is being a Major Contender or Aspirant on the PEAK Matrix, an unfavorable outcome?

No. The PEAK Matrix highlights and positions only the best-in-class providers / technology vendors in a particular space. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is itself a favorable recognition.

What other aspects of the PEAK Matrix assessment are relevant to buyers and providers other than the PEAK Matrix positioning?

A PEAK Matrix positioning is only one aspect of Everest Group’s overall assessment. In addition to assigning a Leader, Major Contender, or Aspirant label, Everest Group highlights the distinctive capabilities and unique attributes of all the providers assessed on the PEAK Matrix. The detailed metric-level assessment and associated commentary are helpful for buyers in selecting providers/vendors for their specific requirements. They also help providers/vendors demonstrate their strengths in specific areas.

What are the incentives for buyers and providers to participate/provide input to PEAK Matrix research?

- Enterprise participants receive summary of key findings from the PEAK Matrix assessment
- For providers
  - The RFI process is a vital way to help us keep current on capabilities; it forms the basis for our database – without participation, it is difficult to effectively match capabilities to buyer inquiries
  - In addition, it helps the provider/vendor organization gain brand visibility through being in included in our research reports

What is the process for a provider / technology vendor to leverage its PEAK Matrix positioning?

- Providers/vendors can use their PEAK Matrix positioning or Star Performer rating in multiple ways including:
  - Issue a press release declaring positioning; see our citation policies
  - Purchase a customized PEAK Matrix profile for circulation with clients, prospects, etc. The package includes the profile as well as quotes from Everest Group analysts, which can be used in PR
  - Use PEAK Matrix badges for branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.)
- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with Everest Group; please contact your CD or contact us

Does the PEAK Matrix evaluation criteria change over a period of time?

PEAK Matrix assessments are designed to serve enterprises’ current and future needs. Given the dynamic nature of the global services market and rampant disruption, the assessment criteria are realigned as and when needed to reflect the current market reality and to serve enterprises’ future expectations.
