Technology Vision 2024

According to business leaders surveyed globally:

believe how we interact with data is changing with Al (to receiving direct advice and answers vs. broadly searching for information)

believe AI agent ecosystems represent a significant opportunity for their organization

more human will massively expand the opportunities of every industry

believe making technology

expect how we interact with Al will transform (as human interface technologies enable better understanding of behaviors and intent)

> think it's more important than ever to innovate with purpose considering the rapid pace of technology advancements
