

Accenture Software for  
Plant Maintenance

# Accenture Blueworx

Easily connect and mobilize  
asset management workforces

# Accenture Blueworx

In today's "always on" world, communications are expected to be informative and instant. Fast, accurate data is the lifeblood of good business decision making, whether that's keeping check of stock, people or finances. Yet, there's one line of work that can suffer more than most from poor connectivity and data downtime—asset maintenance and management, whether in factories or out in the field.

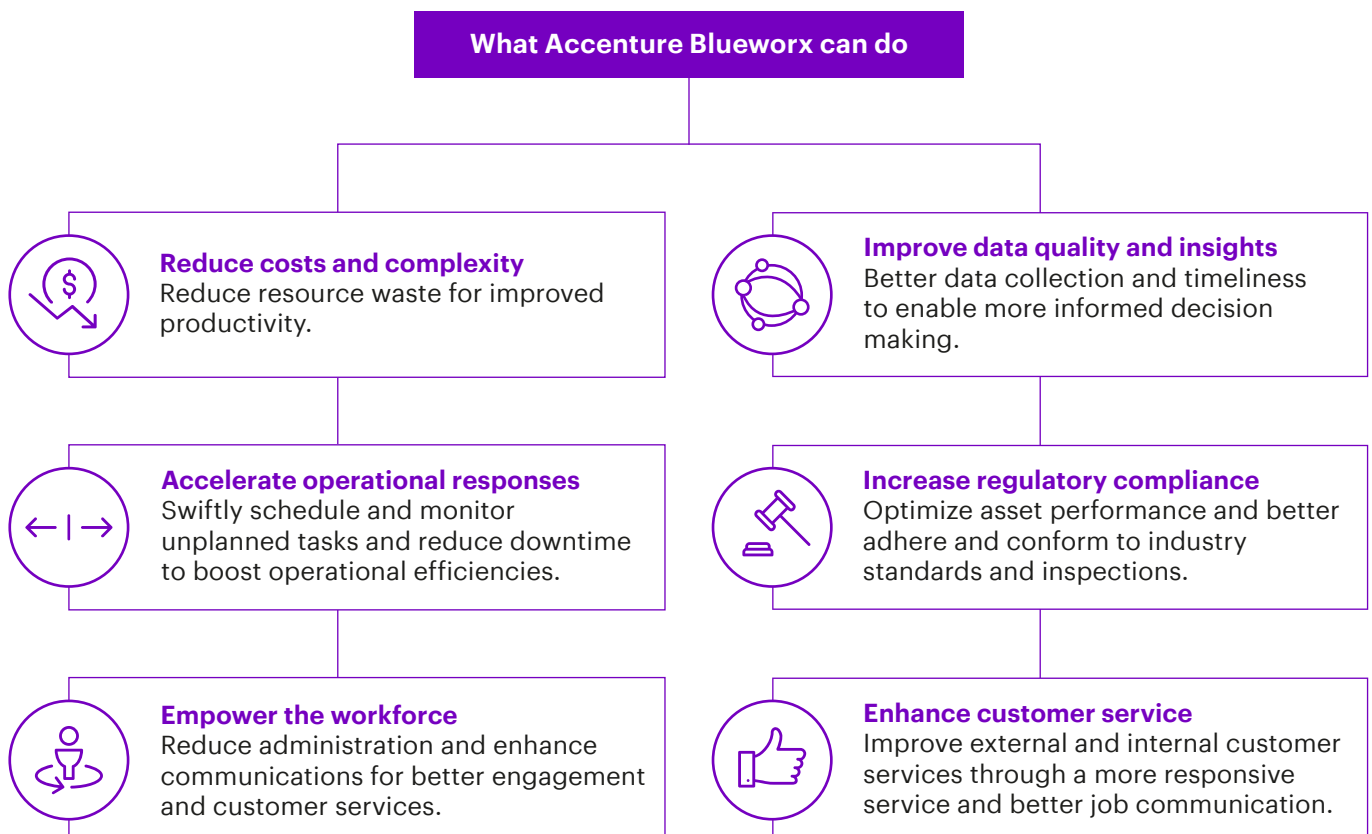

Accenture Blueworx is an easy-to-use, comprehensive enterprise management solution for SAP Plant Maintenance and S/4HANA. Designed specifically to meet the needs of asset maintenance and inspection workers, it enables them to connect to SAP to exchange information on the iOS, Android, or Windows 10 devices already in their hands.

Accenture Blueworx offers significant business benefits, including improved data quality, cost savings, and increased productivity. The technology is deeply integrated within SAP, supporting large offline data volumes, making it the best choice for complex mobile applications.

## What can you do?

Whether you want to tie an asset inspection to an event, streamline crew management to free up supervisors, or give your workforce comprehensive and configurable functionality, Accenture Blueworx can support:

- Workforce engagement
- Resource waste reduction
- Productivity improvements
- Downtime reduction
- Regulatory and standards compliance
- Customer service delivery improvements
- Enhanced decision making

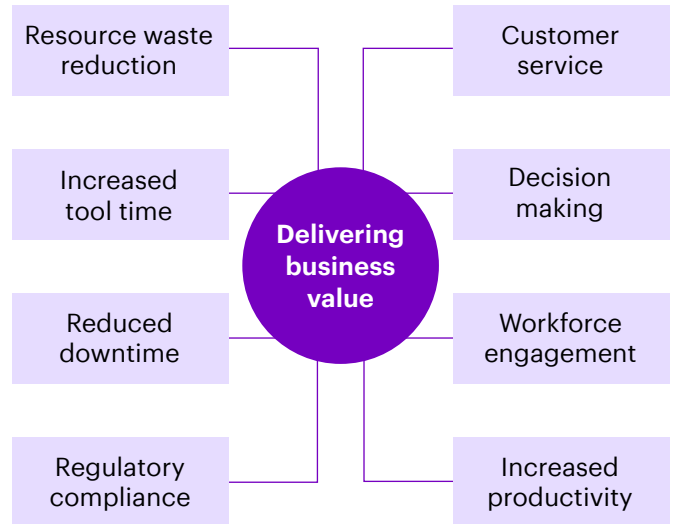

## How can you benefit?

Accenture Blueworx enables maintenance workers to better manage core functions with wider and deeper functionality and configuration options than the competition.

The software is built from inside SAP for backend processing so that it is efficient and effective with complex offline mobile applications. And with a simple SAP Fiori user experience, the app is easy to adopt and use.

Using technology that supports large offline data volumes and one code source for all operating systems and browsers, the solution offers enhanced workforce engagement, with a tool that “works like they do, where they do”.

## How customers benefit?

## Voices of our customers

“The team finds the interface simple to navigate and very easy to use. They like using Accenture Blueworx, which makes support of the software a breeze.”

Anthony Pierotti, SAP Functional Analyst, Hydro Tasmania

“Fast and simple to deploy, and with the initial set up taking only 30 days, our implementation costs were minimal, too.”

Vanea Chisno, IPS (Acting) Corporate Solutions Manager, Hydro Tasmania

“So easy to learn and use in the field, actually did the Change Management for us.”

Mike Hopkins, ERP Team Lead for the Department of Conservation

# About Accenture

Accenture is a leading solutions and services company that helps the world's leading enterprises reinvent by building their digital core and unleashing the power of AI to create value at speed across the enterprise, bringing together the talent of our approximately 784,000 people, our proprietary assets and platforms, and deep ecosystem relationships. Our strategy is to be the reinvention partner of choice for our clients and to be the most client-focused, AI-enabled, great place to work in the world. Through our Reinvention Services we bring together our capabilities across strategy, consulting, technology, operations, Song and Industry X with our deep industry expertise to create and deliver solutions and services for our clients. Our purpose is to deliver on the promise of technology and human ingenuity, and we measure our success by the 360° value we create for all our stakeholders.
