Sustainability Accounting Standards Board Index

2025

Sustainability Accounting Standards Board (SASB) Index

This index reflects our alignment with the “Software & IT Services” industry standard from the SASB framework.

The Sustainability Accounting Standards Board (SASB) Standards provide industry-based disclosures on sustainability-related issues relevant to investor decision-making. In 2022, the International Sustainability Standards Board (ISSB) assumed responsibility for SASB Standards and the ISSB's Standards build on the SASB Standards.

In this index, we either reference existing disclosures or respond directly. We currently do not report all metrics, and in some instances, only partial information is available. We will continue to evaluate developments and evolve our disclosures.

All reported data is as of and for the fiscal year ended August 31, 2025, unless otherwise noted.

This index may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as “may,” “will,” “should,” “likely,” “promise,” “commit,” “anticipates,” “expects,” “intends,” “believes,” “estimates,” “positioned,” “continues,” “maintain,” “remain,” “goal,” “target,” “plan,” “recurring” and similar expressions are used to identify these forward-looking statements. These statements involve a number of risks, uncertainties and other factors that are difficult to predict, which could cause actual results to differ materially from those expressed or implied, including changes in clients' levels of business activity, regulatory legislative developments, changes in global economic conditions, and updates to our business strategy. For a more detailed discussion of these and other factors, see the information under “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our most recent Form 10-K filed with the SEC. Our forward-looking statements are not intended to create legal obligations and rights speak only as of the date of this index or as of the date they are made, and we undertake no obligation to update them, notwithstanding any historical practice of doing so. Forward-looking and other statements in this document may also address our sustainability progress, plans and goals (including environmental matters), and unless specifically indicated otherwise, the inclusion of such statements is not an indication that these contents are necessarily material to Accenture, our investors, or other stakeholders or required to be disclosed in Accenture’s filings, in each case, under U.S. securities or any other laws or requirements that may be applicable to Accenture. In addition, historical, current and forward-looking sustainability-related statements have been, and may in the future be, based on standards for measuring progress that are still developing; historical or current goals, commitments, or estimates; internal controls and processes that continue to evolve; and assumptions that are subject to change in the future. This report is not a comprehensive description or representation of all of our sustainability activities during the reporting period; instead, this report is intended to highlight some of our sustainability efforts during fiscal year 2025.

We caution you that these statements are not guarantees of future performance, nor promises that goals or targets will be met, and are subject to numerous and evolving risks and uncertainties that we may not be able to predict or assess. In some cases, we may determine to adjust our commitments, goals or targets, or establish new ones to reflect changes in our business, operations or plans.

Third-party data have been obtained from sources believed to be reliable, but the suitability of the design and effectiveness of the third-party systems and associated controls over the accuracy and completeness of the data has not been independently assessed, including information relating to the environmental benefits and quality of acquired or contracted carbon credits or renewable electricity.

Website references throughout this document are provided for convenience only, and the content on the referenced websites is not incorporated by reference into this document.

All amounts throughout this report are stated in U.S. dollars, except where noted.

Some imagery in this document has been generated using artificial intelligence technology.
