

AI CONTROL PLANE

BY ACCENTURE AND TELSTRA

VIDEO TRANSCRIPT

Narrator: AI adoption is accelerating across every industry every day new models, new applications, and new risks to manage. Introducing the AI control plane by Accenture and Telstra.

A connected platform that gives Telstra one governed view to responsibly manage and optimize its AI ecosystem. It shows what's running, how it's performing, where risk or cost could emerge, giving Telstra the opportunity to act early and make data driven decisions.

Now Telstra can switch models, manage consumption and reuse AI capabilities across the enterprise from one place.

AI control plane is the foundation that enables Telstra to scale AI safely and efficiently by bringing together performance optimization, cost management and risk governance into a single capability.

It provides the control, visibility and guardrails required for enterprise-wide AI adoption. Telstra has shown that AI adoption, cost control, and business outcomes can go hand in hand with the AI control plane. AI grows on Telstra's terms..
