Intelligent
Edge

The market is constantly evolving and this calls for rapid responses, with solutions that ensure optimized time-to-delivery, controllable costs, scalable infrastructure to handle unpredictable demands. To meet these needs, migration or transformation to private or public Cloud infrastructure can help customers achieve their business goals and targets. **At ACIC Roma, we help customers** respond by identifying

solutions that allow them **to get the most out of their investment in the Cloud, to modernize their infrastructure and adopt services that allow customers “to run differently”**. The process leverages use cases focusing on Infrastructure Modernization, Journey to Cloud, Cloud Operations and Cost Optimization, without overlooking our innovative Cloud Network and Digital Workplace solutions.

Most organizations need to shift towards agile business transformation. To achieve this goal, they are reorganizing and restructuring their business programs so as to modernize their legacy technology and application infrastructure by leveraging Cloud-Native technologies. At ACIC Roma, they can access the tools to support them in their

transformation process: **from innovative solutions for provisioning and managing infrastructure** capable of hosting containerized services and **application transformation support tools, through to technologies that can improve agility** (e.g., by leveraging mainframe virtualization and off-loading).

The world is a different place now and there is a growing need to extract value from data, which plays a key role in helping companies to grow and reinvent their business. At ACIC Roma, **we aim to guide our customers towards a data-driven, data-native strategy, aligning their data**

and business strategies. We work to help customers along this path, guiding them through the adoption of innovative Data Governance and Management solutions, especially through the use of Applied Intelligence and Machine Learning technologies.

Edge Computing is a turning point, a frontier technology that brings computing, storage and connectivity capabilities to the multitud of devices already connected and destined to multiply with the spread of innovative connectivity services such as 5G. This enables customers to make the most of

new technologies, such as Internet of Things (IoT), Machine Learning, 3D printing, Digital Twin and many more. At ACIC Roma we give customers access to our experience in **evaluating, designing, developing and successfully managing intelligent and innovative Edge platforms.**

About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organizations build their digital core, optimize their operations, accelerate revenue growth and enhance citizen services — creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 733,000 people serving clients in more than 120 countries.

Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song. These capabilities, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities.
